ISU INCUBATOR

Your Gateway to Space

Space

Your project is related to the **space industry** and you wish to be put in contact with its actors.

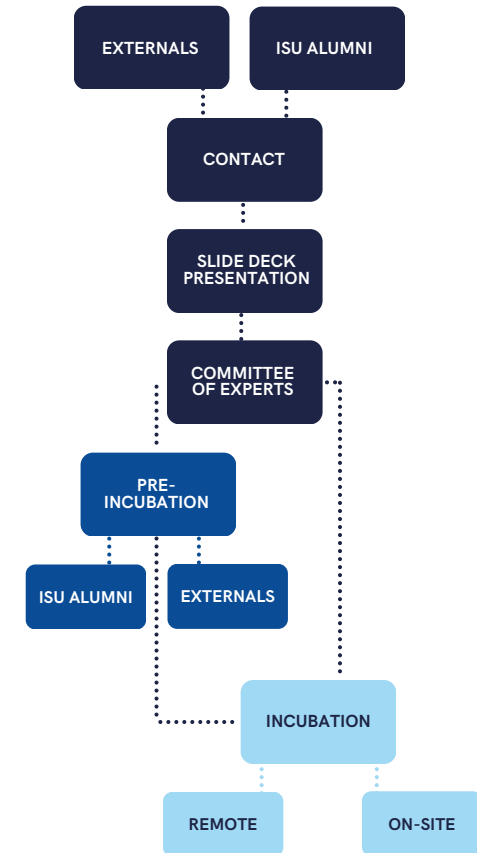

Pre-incubation

We offer a **3 months pre-incubation** period that will allow you to develop your project. You will be accompanied to define your **business plan**, to identify **customers**, technical **partners**, and **financing**.

Incubation

Then you have two years to develop your project in our offices, with privileged access to **ISU's expertise**, its students and faculty, and the **space sector contacts**. You will receive help with financing as well as setting up your research and development.

ISU PROCESS
